

## Listing by Layer

This listing was compiled by searching the ArcStorm database maintained by BC MSRM IMB and sorting the features by FCODE. The numbers will be different than those in the original MOEP files from Geographic Data BC, due to dropping some features, dropping some zero-length lines, and joining short lines into longer ones.

Note that the TDEM (elevation points and 3D breaklines) are NOT included in this listing, as they have not been fully loaded as of June 1999.
